Introduction

Thank you for using TunePat Apple Music Converter for Windows!

[TunePat Apple Music Converter for Windows](#) is specially designed to record tracks from Apple Music with original quality (up to 320 kbps) kept, enabling users to enjoy lossless Apple Music offline on any devices. It is regarded as one of the fastest music converters for Apple Music, as it supports batch conversion and is able to convert music at 10X speed. After converting, the program will keep ID3 tags, including title, artist name, track number, year, disc number and more. Meanwhile, it allows users to organize the output files by artist, album, artist/album, or album/artist.

It requires no further plug-ins and additional apps, including iTunes or Apple Music app. Armed with a concise interface and powerful functions, it can easily download songs from Apple Music web player and enable users to transfer the output files to any media player or application for offline playback.

Key Features

- Record songs from Apple Music;
- Convert Apple Music songs to MP3/AAC/WAV/FLAC/AIFF/ALAC format;

Tutorial of TunePat Apple Music Converter for Windows

Registration Tips:

1. Make sure your computer is well-connected with the Internet.
2. We suggest you simply copy & paste the Registration information into the pop-up dialog.
3. Make sure both Registration Email and Registration key are provided by our company after purchasing. If you have not paid, please click **Buy Now** to finish the payment and get the license.
4. Please make sure the Registration Email and Registration key you entered are complete, and do not insert any blank before or after them. Otherwise, an error message will pop up as below:

The screenshot shows a registration dialog box titled "TunePat Apple Music Converter" with a close button (X) in the top right corner. The main text reads: "Please enter the registration information to upgrade trial version to registered version." Below this, there are two input fields: "E-Mail:" with an envelope icon and "Code:" with a key icon. A red warning message states: "The registration information must be entered exactly as they appear in your confirmation email. Using the copy and paste method to enter the license is recommended." At the bottom, there are three buttons: "Buy Now" (red), "Free Trial" (light blue), and "Register" (blue).

Launch Apple Music Converter

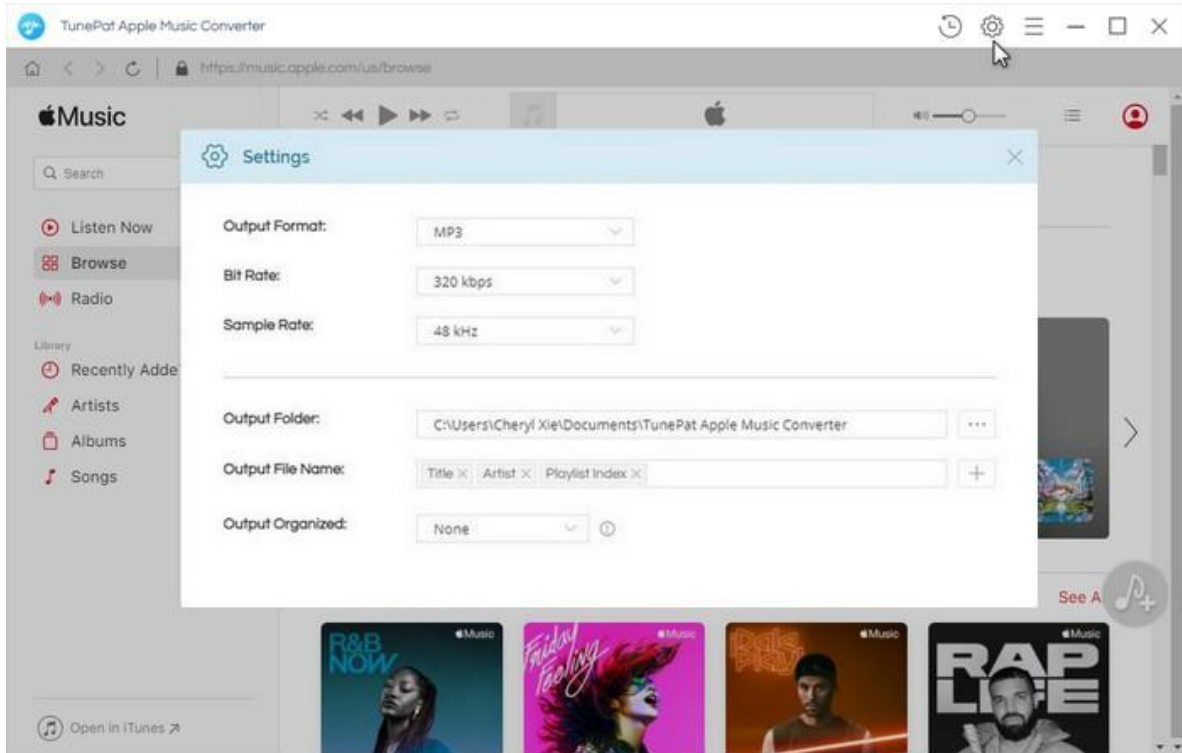

After downloading and installing Apple Music Converter, please launch the program and click **"Open Apple Music Web Player"**. Then you can follow the prompt to sign in with your Apple ID.

Choose Output Settings

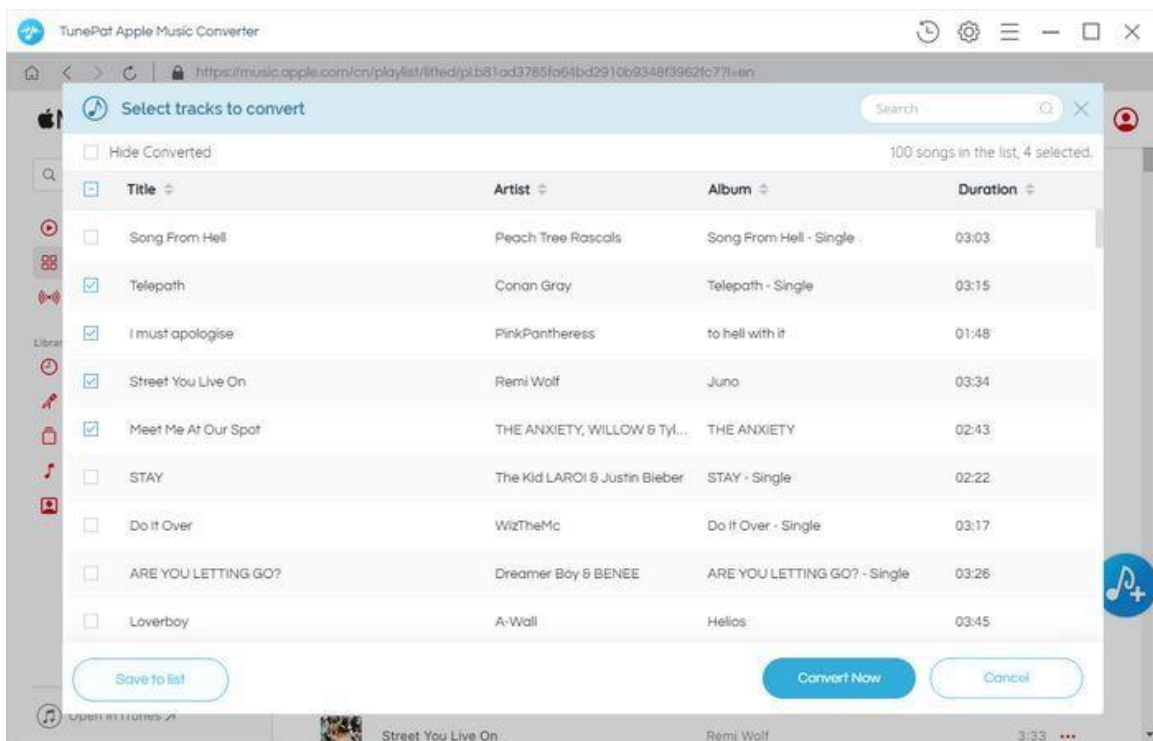

Click the "Settings" button  on the upper right. Here you can choose output format (MP3, AAC, WAV, FLAC, AIFF, and ALAC), output quality (320kbps, 256kbps, 192kbps, 128kbps), Sample Rate, output folder and how you like the audio files to be organized and so on. If you don't change the output path, the output audio files will be saved into the default folder. In addition, you can customize the name of the output folder, and choose to open the output folder or put the system to sleep after conversion.

Add Apple Music Tracks

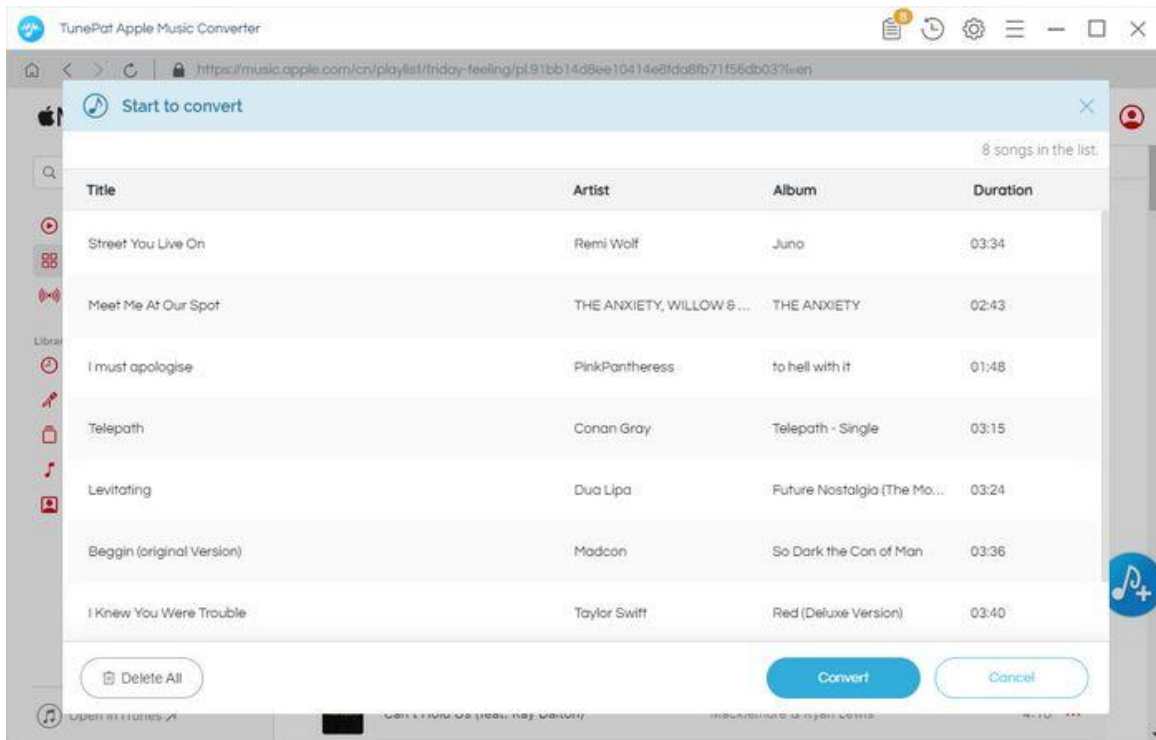

Choose a playlist, artist, or album and open it, then click the **"Add to list"** button  at the bottom right corner. You will see a pop-up dialog which display the songs that you can convert. Just select the songs you want to convert. Click on the **"Convert Now"** button to begin the conversion, or if you would like convert songs from different albums, playlists or artists, you can click the **"Save to list"** button.

Then repeat the steps below. When finished adding all songs you want into the Convert list. Click on the Convert list icon in the upper right corner and tap on the **"Convert"** button on the pop-up.
