## Register TunePat Tidal Media Downloader

TunePat has a user-friendly interface and it is quite easy to register for the program. After purchasing, you will receive a confirmation email, including your registration information.

**Step 1:** Click the “Menu” icon on the upper right corner of the screen and click "Log In" to open the registration window below and complete the registration process.

**Step 2:** Then copy and paste the registration Email and Code into the registration window. Select "Log In" to confirm.

### Tips:

1. Make sure your computer is well-connected to the Internet.

## Tutorial of TunePat Tidal Media Downloader

---

2. The registration code is case-sensitive. Please do not insert any blanks before or after the registration information. Otherwise, normal registration will not be possible. We suggest you directly copy & paste the Registration information into the pop-up dialog.
3. Make sure both the Registration Email and Registration key are provided by our company after purchasing. If you are not a member yet, please click Buy Now to finish the payment and get the license.
4. Please make sure you downloaded the correct program. The license key between different programs and different versions (Windows and Mac) is not universal.
5. A license key of TunePat can only be used by one computer device. If you register and use it on multiple devices simultaneously, the registration code will become invalid, and you cannot register successfully.

## Installation & Interface

### Add Tidal Music to TunePat

You can choose to convert songs **from the Tide app or web player**. Select an audio source and follow the instructions to log in to your Tide Music account. When you choose to convert songs from Tidal web player, click "**Pop out Player**" or "**Keep in Converter**" to switch whether to access the web player in a new window. Please select on demand.

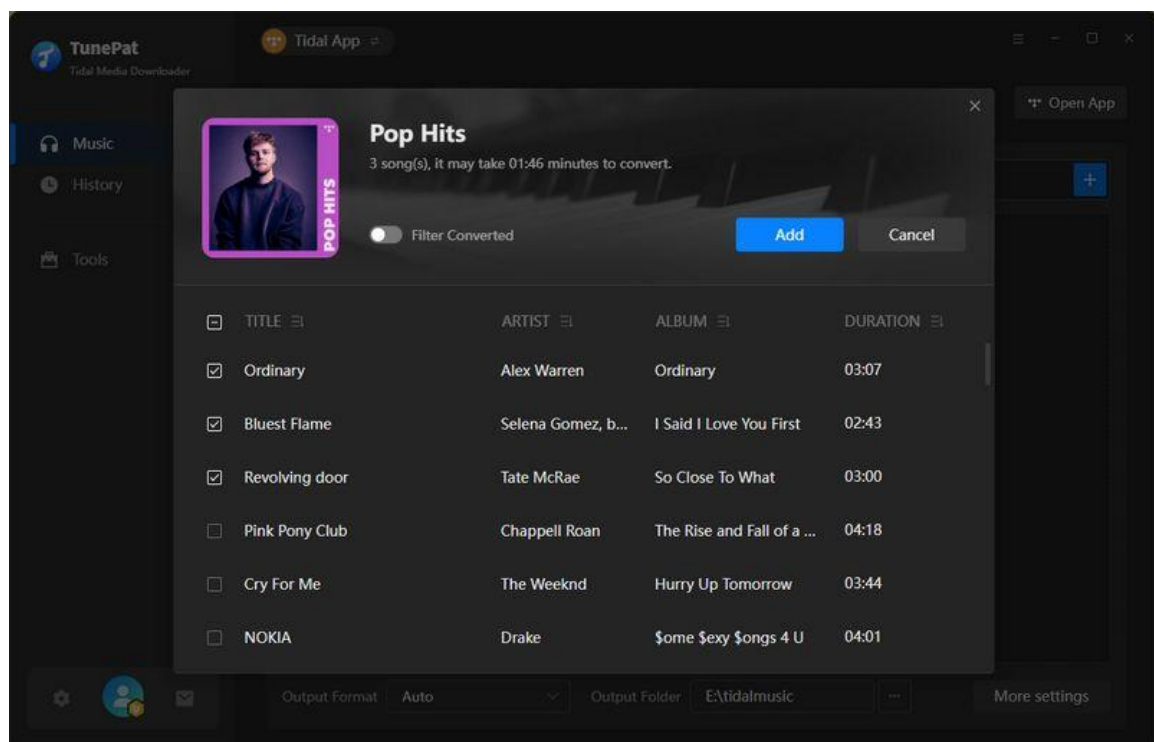

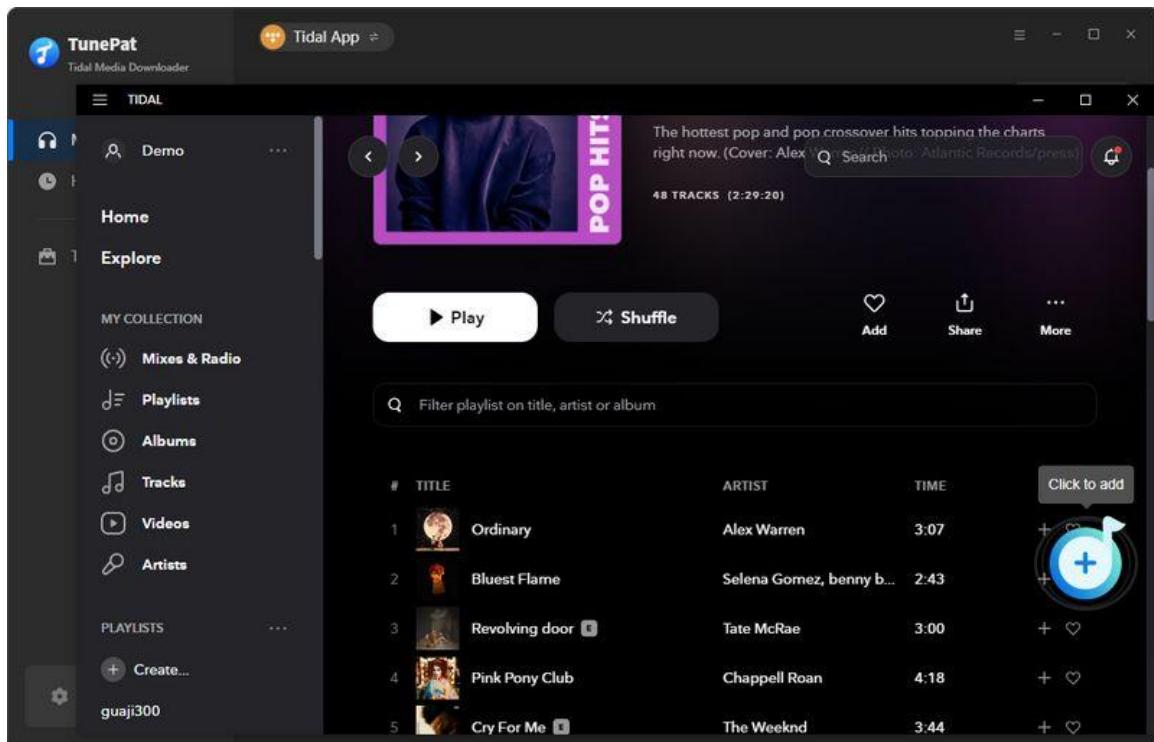

Simply open the desired song, album, playlist, or podcast that you wish to convert and click the blue "**Click to Add**" button located in the lower right corner. Similarly, the identified songs within the current

---

**\*TIPS:** If necessary, you can manually select songs or click the "**Filter Converted**" button in the upper left corner to filter out songs that already exist in the current local path, avoiding duplication.

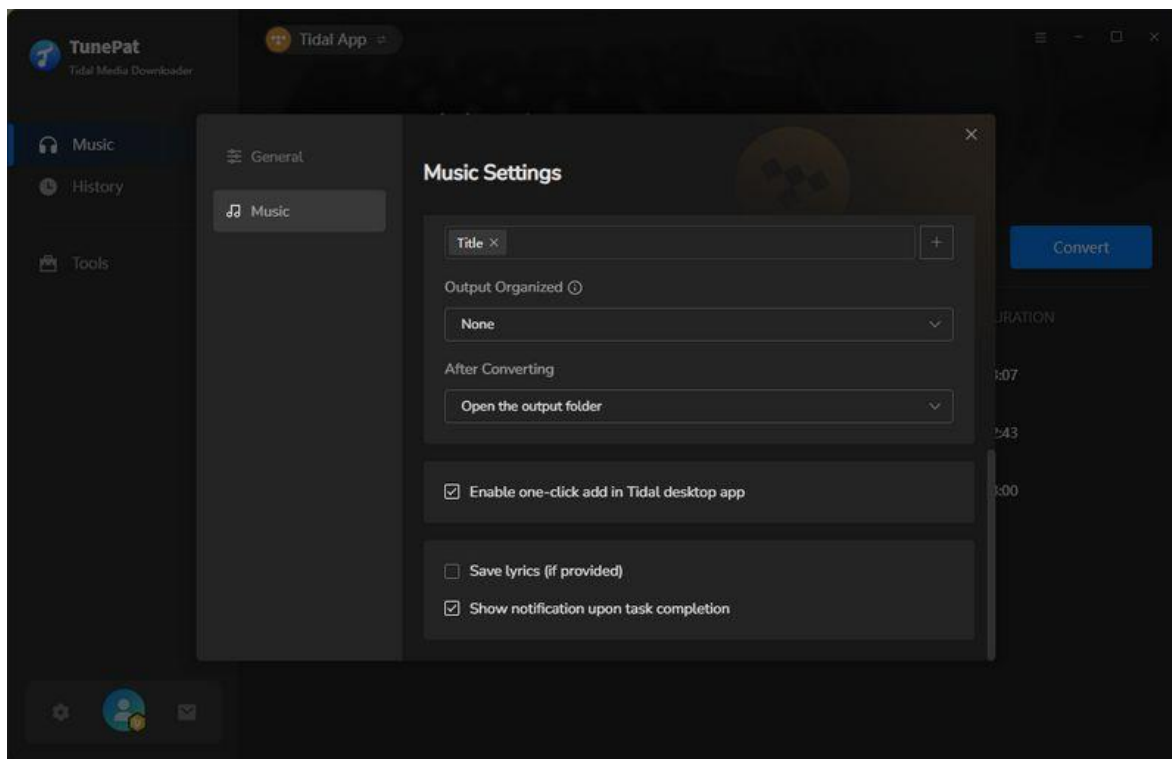

## Customize Output Settings

Before you start converting songs, enter the **Settings** part from the left side of the program interface. Here, you are allowed to customize the following parameters.

## Tutorial of TunePat Tidal Media Downloader

You can change the conversion mode, output format, bit rate, sample rate, output file name, etc. You can also customize the order in which the songs are arranged after downloading.

### Tips:

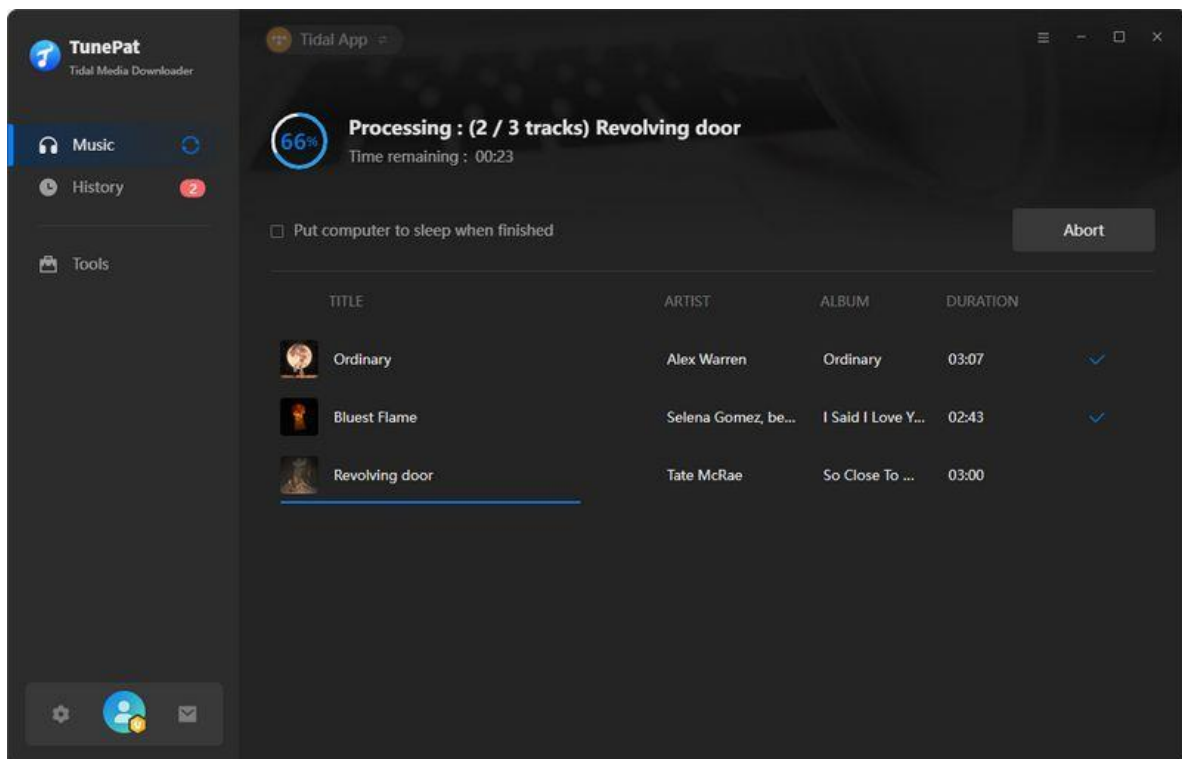

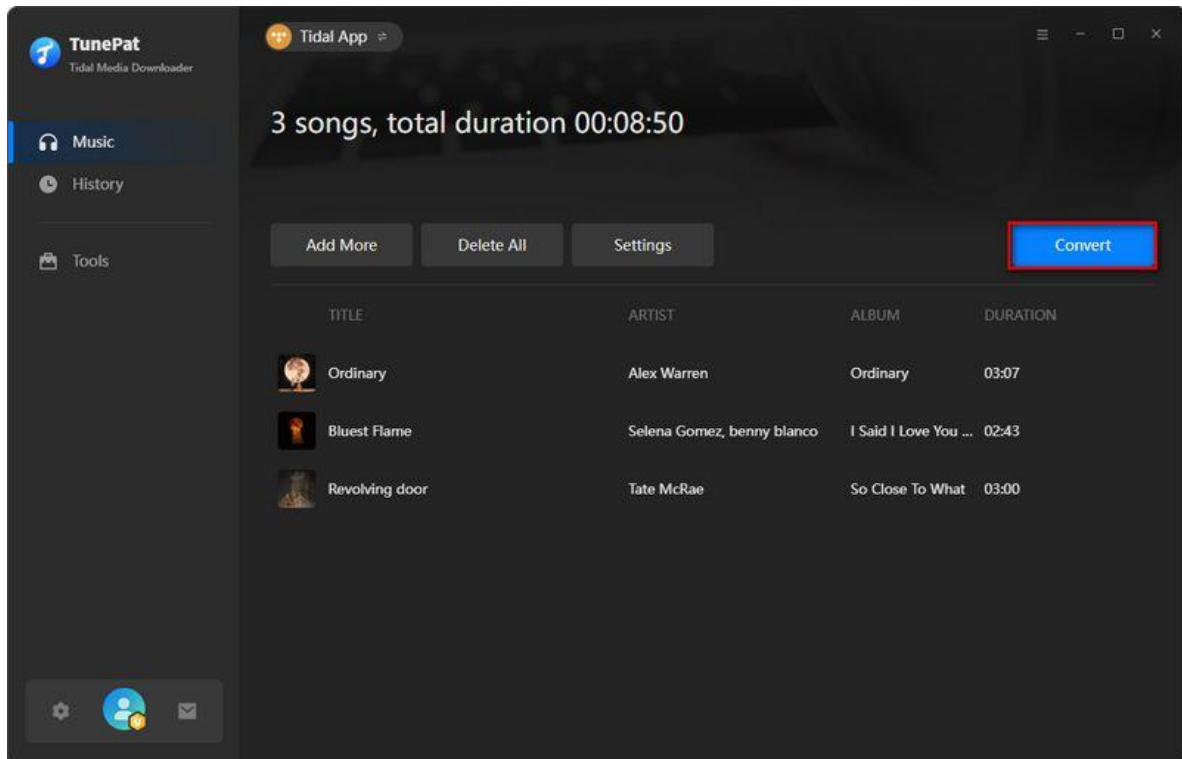

- If you want to download the lyrics with the song, please turn on the “**Save lyrics (if provided)**” button. And the lyrics will be downloaded in LRC or TXT format.
- To get the original quality, it is recommended to choose “**Auto**” as the output format.

## Convert Tidal to Local Files

The songs you just added are arranged into this page. If you want to continue selecting songs from other albums or playlists and convert them all at once, please click the “**Add More**” button. When you have selected the tracks you want to convert, click “**Convert**”.
